📊 Iteration 1.6: Data Visualization

Deadline: **Thursday 12 March 23:59**

What is this?

This weekend, you have an independent learning assignment. You will complete the **Data Viz** mini-course on **Kaggle**, one of the world's leading platforms for data science and AI.

This is not just about charts. It is about learning how to work on a real professional platform that top AI engineers use every day, that's the real skill here.

Upon completing the course, Kaggle will award you a **Statement of Accomplishment**: a certificate you can share on LinkedIn and keep in your portfolio.

Step-by-Step Instructions

Step 1: Create a Kaggle Account

1. Go to **www.kaggle.com** in your browser
2. Create an account and verify it

Step 2: Find the Data Visualization Course

1. While logged in, go to: **www.kaggle.com/learn/data-visualization**
2. Click the **Start Course** button
3. The course has 7 lessons: you will complete all of them

Step 3: Complete All 7 Lessons

The 7 lessons are:

- Hello Seaborn
- Line Charts
- Bar Charts & Heatmaps
- Scatter Plots
- Distributions
- Choosing Plot Types & Custom Styles
- Final Project

How each lesson works:

1. Read the short tutorial at the top of the page
2. Scroll down to the coding exercise
3. Fill in the missing parts of the code
4. Click **Save & Run All** to submit your exercise
5. A green checkmark appears when you pass => move on to the next lesson

Take your time. Read each tutorial carefully before doing the exercise, the answers are usually right there.

Step 4: Claim Your Certificate

1. After completing all 7 lessons including the Final Project, Kaggle automatically generates your **Statement of Accomplishment**
2. Go to **www.kaggle.com/learn** and scroll to the Data Visualization course
3. Click on it: you will see a **View Certificate** button
4. Open the certificate page, your name will be on it

Step 5: Submit Your Certificate

1. On the certificate page, **copy the full URL** from your browser's address bar
2. Send that link to the **Discord post in #ai-space titled "[AI School] Iteration 1.6 | Data Visualization"**before **Thursday 12 March EOD**
3. That's it. You're done!

Code gives an error	Re-read the tutorial above the exercise, the answer is usually right there
Stuck?	Post your question in #ai-chat, others will help
